Positions are based in Perth, Collie and Kalgoorlie (non-FIFO)

Secure your opportunity for
job and lifestyle balance.

BE A LEADER IN DRIVING BETTER SAFETY AND HEALTH OUTCOMES

Introduction

The Department of Mines and Petroleum (DMP) is responsible for ensuring the State's resources sector is developed and managed responsibly and sustainably for the benefit of all Western Australians.

As the State's regulator for extractive industries and dangerous goods, DMP works with other Government agencies and industry to ensure workers, the community and environment are protected.

Western Australia's resources industry has seen growth, not only in the number of workers, but also the size and complexity of operations. One of the challenges for the resources sector is ensuring the safety and health of its workers.

The Government's vision is for a proactive safety regulator working with industry to create an environment in which resilient workplace cultures are the norm, and companies, workers and the wider community are confident that industry is operating as safely as possible.

Resources Safety

The Department of Mines and Petroleum's Resources Safety Division is the industry's safety regulator for the minerals, petroleum and dangerous goods sectors. As a safety regulator, we aim to be:

- Transparent – we have clear rules and processes
- Accountable – we explain our performance
- Consistent – the same outcome is sought, although our approach may differ depending on the circumstances
- Proportionate – our actions are guided by the safety and health risk
- Targeted – we focus on the most important safety and health outcomes.

We also provide tangible support to industry to enhance its safety performance through cultural change. For industry, the ultimate outcome will be a reduction in the number and severity of incidents.

Operational Context

The Mines Safety Branch administers the *Mines Safety and Inspection Act 1994*, promoting occupational safety and health for people involved in the exploration, mining, extraction and processing of mineral resources. Functions include:

- Seeking and enforcing regulatory compliance
- Conducting inspections, audits and investigations
- Contributing to national uniformity initiatives
- Promoting safety and health outcomes, including education and information
- Undertaking technical assessments and reviews, including statutory approval processes

This is your opportunity to make a difference the safety and health of Western Australia's minerals industry.

Inspector of Mines – Mechanical, Mines Safety Branch

The position of Inspector of Mines – Mechanical will undertake the following duties and responsibilities:

- Administers the *Mines Safety and Inspection Act 1994* and Mines Safety and Inspection Regulations 1995 as an Inspector of Mines.
- Supports and embraces safety reform continuous improvement and change management approaches.
- Contributes to the implementation of best practice standards and achievements of the Division's Operational Plan.
- Conducts audits inspections and reporting on working places and practices related to the mechanical aspects in mining operations and conducts and reports on technical reviews.
- Undertakes investigations and reports on mechanical aspects of incidents in mining operations and appears at inquiries and inquests of incidents held with respect to mining accidents.
- Executes a range of standard enforcement activities aligned with the Division's programs and policies.
- Takes part and contributes to investigation and prosecution reports and present expert evidence as required.
- Liaises with and provides technical advice to stakeholder's professional associations and the community on matters related to occupational safety and health in mining and to sound mining practices in general.
- Responds to requests for regulatory and technical information; initiate and respond to correspondence; prepare documentation to enforce legislation.
- Contributes to the achievement of individual and collective team goals including working within multidisciplinary team within a project management framework.
- Ensures compliance with governance reporting standards and protocols and risk management requirements.
- In collaboration with the Mechanical Discipline Group facilitates the achievement of regional capability and cultural change.
- Represents the Department on advisory committees and working parties as required.
- Undertakes training and professional development.
- Contributes to or responsible for the achievement of corporate objectives through effective management by ensuring that stakeholders are dealt with in a professional and timely manner.
- Builds productive working relationships with community stakeholders to ensure effective community engagement, provide opportunities to input on policy and to facilitate agreement of mutually beneficial solutions.
- Provides effective leadership within corporate policies and procedures, acts with integrity and ensures staff demonstrate ethical behaviours aligned with the Department Code of Conduct.
- Performs other roles/tasks as directed.

What is required to undertake this role successfully?

Job Requirements

- A tertiary vocational or trade qualification in a mechanical discipline relevant to the resources sector.
- Demonstrated knowledge and substantial experience of the practical application of occupational safety and health legislation and/or risk management principles in a mechanical context within the resources sector.
- Experience and skills in investigations managing emerging issues changes and projects.
- Demonstrated ability to listen, understand and adapt to communication style and message to suit a range of audiences including the ability to negotiate effectively and convey information and structures via written and oral communication.
- Possession of a current WA 'C' Class Driver's Licence.

The following Capabilities are also required for this position:

- Commits to meeting objectives, identifies and implements appropriate risk strategies and follows up to finalise work.
- Coordinates and manages productive and effective relationships and partnerships with internal and external stakeholders.
- Adheres to the Code of Conduct, acts with integrity and behaves in an honest, professional and ethical way.
- Understands strategic objectives, trends and factors that may influence work plans and goals.
- Prepares reports on analytical research and/or investigations.

These capabilities will be assessed further in the selection process.

Please note that completion of a National Police Clearance, Pre-employment Medical Assessment (including baseline hearing test), Psychological Assessment and Pre-employment Conflict of Interest declaration will also form part of the selection process.

Conflict of Interest: given the potential consequences of decision making power associated with this position, the successful candidate may not be permitted to trade in resources sector shares and must declare conflict of interests prior to commencement. The Contact Officer will provide further details if required.
