### Role summary

At an experienced professional level, under general direction and using initiative and independent judgement, undertakes veterinary pathologist duties.

Utilises veterinary pathology expertise in the investigation, diagnosis and reporting of animal diseases in veterinary species, including surveillance for emergency animal diseases, emerging diseases, residue incidents and endemic disease diagnosis.

Performs gross and microscopic pathological examination of animal tissues, coordinates diagnostic submissions, interprets and integrates laboratory results and provides input into comprehensive reports to internal and external stakeholders.

Contributes scientifically valid diagnostic and surveillance data to support WA and national animal health monitoring and market outcomes, including surveillance for conditions of state and national significance.

## About us

The Department of Primary Industries and Regional Development's (DPIRD) role is to ensure that primary industries and regions are key contributors to the Government's agenda for economic growth and diversification, job creation, strong communities and better places. Our goals are to:

- **Protect:** to manage and provide for sustainable use of our natural resources and soils, and to protect Western Australia's brand and reputation as a reliable producer of premium, clean and safe food, products and services.
- **Grow:** to enable the primary industries sector and regions to increase international competitiveness, grow in value and social amenity and become a key pillar of the State's economy.
- **Innovate:** to support a culture of scientific enquiry, innovation and adaptation across primary industries and regions to boost industry transformation, economic growth and employment.

## Our values

Our values are critical in creating a healthy and dynamic culture that helps each and all of us to make our best contribution, to develop a workplace where we feel excited about our work and results and where other people will increasingly want to join our team. Our values underpin how we operate:

- We value **relationships** - Our relationships with our clients, colleagues and stakeholders are at the heart of everything we do
- We are **resilient** - We recover from setbacks, embracing and adapting to change because we have a clear focus on the big picture and long term impact
- We are **responsive** - We understand the needs of our clients, colleagues and stakeholders and add value by tailoring our solutions accordingly
- We focus on **results** - We strive to develop and provide excellent services that delivers meaningful results to the community we serve.

## Key responsibilities

The key responsibilities of the role include, but are not limited to, the following:

### Animal Pathology

- Conducts animal disease investigations using pathology skills and laboratory techniques and resources.
- Undertakes and records surveillance for animal diseases of national and state significance under general direction.
- Remains prepared to recognise and respond to exotic disease incursion, emerging diseases, residue issues, zoonoses or other significant conditions of animals.
- Communicates requirements and outcomes of laboratory testing to relevant clients including internal and external stakeholders.

- Assists with quality assurance, continuing education activities and observes laboratory procedures to help maintain DDLS NATA accreditation and professional competency.
- Meets communication requirements particularly with regard to animal disease and laboratory diagnostics.

### **Research and Development**

- Provides veterinary pathology expertise to prepare information for seminars, workshops and field days as required.
- Conducts project work meeting project milestones, agreed outputs and reporting requirements.
- Maintains an up-to-date knowledge and awareness of relevant research, development findings, issues and trends.
- Develops effective relationships with relevant staff members and stakeholders; promote technology, services and resources that are available.
- Contributes to test development, validation and implementation.

### **Strategic Planning and Policy Development**

- Provides pathology input into strategic planning and other planning processes regarding animal health and laboratory practice.
- Contributes to the development and production of strategic animal health research and policy across the Department.
- Provides assistance to operational areas in translating strategic animal health policy into relevant local policy and strategies.

### **General**

- Prepares draft reports, summaries and general correspondence as required.
- Participates in emergency responses as required.
- Performs other duties as required.

### **Work related requirements**

In the context of the role:

#### **Essential criteria**

1. Demonstrated knowledge and experience in veterinary species including performing pathology examinations; selecting specimens for diagnostic laboratory testing and interpreting and applying laboratory data in disease diagnosis.
2. Understanding of reporting requirements, to various stakeholders such as the public, industry groups and Government, with competent use of ICT applications such as databases, spreadsheets and word processing.

#### **Core capabilities**

3. Build effective relationships: Well-developed verbal, written and interpersonal communication skills, including the ability to confidently liaise, collaborate with and communicate scientific information to departmental staff, industry and the community.
4. Challenge for innovation: Demonstrated ability to establish clear plans and timeframes, evaluate performance, identify the need for change, determine action and see tasks and projects through to completion.

5. Think strategically: Well-developed conceptual and analytical skills including the ability to provide practical solutions to challenging issues and problems.
6. Deliver in a changing environment: Well-developed project and time management and organisational skills including the ability to effectively respond to change and to develop and apply advanced veterinary science techniques to enable the generation of advice for animal health and laboratory practice.
7. Lead and empower others: Demonstrated ability to lead teams and work collaboratively in a team environment contributing to the achievement of team goals

### **Desirable criteria**

1. Experience providing veterinary services, including field diagnostics and disease management, to commercial livestock or aquatic species.
2. Experience in use of pathology and laboratory diagnostic techniques in disease investigation in a wide range of veterinary species, including domestic livestock, wildlife and aquatics.

### **Special requirements**

- A degree in Veterinary Science (obtained from an Australian university or recognised equivalent), and current recognised registration (or able to obtain prior to commencement) with the Veterinary Surgeons Board of Western Australia – registration must be maintained whilst employed by the department.
- Post-graduate qualifications in Veterinary Pathology or relevant field, recognised in Australia, equivalent to or exceeding Membership of the Australian and New Zealand College of Veterinary Scientists (ANZCVS).
- An acceptable National Police Certificate (police clearance) is required (if not currently held, must be acquired prior to commencement at applicant's expense)
- The contract of employment specifies terms and conditions relating to this position.
