

Role Statement

Position title:	Senior Manager Quality Services
Position number:	40002003
Salary and Level:	Level 7 PSCSAA 2024
Reports to:	Director Digital Delivery (Level 8)
Direct reports:	Senior Test and Release Coordinator (Level 5)

The organisation

Lotterywest is the only State Government owned and operated lottery in Australia, where all the available profit is returned to the Western Australian Community through discretionary and statutory grants. Lotterywest has supported the Western Australian community for over 90 years. Its vision for 'a hopeful, healthy, connected and sustainable community life for all Western Australians'.

Lotterywest is the employing agency for Healthway, which is the only State Government agency dedicated to health promotion. For over 30 years Healthway has been providing grant funding to sport, arts and racing organisations, community activities, and to health promotion projects and research. Healthway's vision is for a 'healthy and more active Western Australia.'

About the business unit

Technology Services is responsible for the technology services and support IT functions across all areas of the Lotterywest and Healthway businesses. The area is also responsible for the overarching compliance, change management and technology partner services for Lotterywest gaming and Lotterywest and Healthway grant management systems. In doing its work, the Technology Services team works collaboratively across the organisation to ensure technology business needs are met.

The business unit is undertaking transformation in the way it delivers services, consistent with the Board endorsed strategic direction. This is with the purpose to deliver an agile, scalable, responsive team and digital business operating model, including investment in cloud services, focused strategic vendor management and contemporary digital solutions to deliver on current and future business outcomes.

Key focus areas of the position

Reporting to the Director, Digital Delivery, the Senior Manager Quality Services is responsible for defining frameworks for monitoring software engineering processes and methods to ensure quality in order to provide independent assurance that all technology product solutions meet business requirements and organisational expectations. The role has the following key focus areas:

- **Test Leadership and Practice** – Lead the team in industry best practices and help drive process efficiency to uplift the testing maturity of Lotterywest.
- **Verification and Validation** – continuous review of deliverables and artefacts at each project phase for completeness, including clear business requirements and functional

Role Statement

requirements reflect business requirements to reduce the risk of system defects and outages
