Reporting relationships

Superordinate: Network Control Manager, Level 7

Subordinates: No Direct Reports

Key role of this position

Working as part of a team within the Public Transport Authority's (PTA's) Network Control Centre - the Network Control Officer is responsible for controlling the safe, efficient and effective coordination of all rail traffic and network occupations across the PTA's urban rail network. The primary objective of this role is to prepare, monitor, review and restore scheduled operational activities in accordance with the PTA's Safeworking Rules and Procedures and relevant business instructions.

Core duties and responsibilities

- Operate, review and monitor a computerised Network Control signalling system to facilitate the safe movement of all rail traffic, facilitate safe network occupations and restore scheduled operational activities.
- Ensure all rail traffic are on schedule, have correctly allocated pathways and operate within the PTA's Safeworking Rules and Procedures and in accordance with Train Management Guidelines and procedures.
- Respond to equipment failure and warning systems.
- Initiate and coordinate emergency procedures, emergency services and the provision of alternative transport in response to incidents ensuring safe network operations within area of control.
- Plan and undertake extensive analysis for the resumption of normal services following an event or an incident.
- Work with the Network Control Supervisors to ensure safe, efficient and effective coordination of rail traffic.
- Ensure other affected team members, rail traffic crew, operational staff and maintenance personnel are promptly advised of any adverse network operations.
- Ensure safety critical information is provided to NCOs at handover during a shift changes.
- Provide advice to planning and other PTA staff on timetabling to ensure continuous improvement and the achievement of KPIs.
- Participate in the review and audit of major incidents, the development of solutions and the implementation of approved changes.

- Remain operationally alert to ensure safe, efficient and effective coordination of all rail traffic and network occupations within area of control.
- Monitor and report against the Key Performance Indicators (KPI's) relating to urban train services as detailed in the Transperth Train Operations Business plan and relevant PTA business instructions.
- Populate and maintain Network Control Diagrams, Safeworking forms, incident and fault reports and other relevant operational data reflecting actual operations.
- Induct, mentor and teach new Network Control Officers undertaking the on-panel component of their training.
- As a subject matter expert (SME), assist the Network Control Manager and relevant stakeholders from the Learning and Organisational Development division in the development and review of Network Control Officer training material.
- As a SME, assist the Network Control Manager, Network Control Supervisors and relevant stakeholders in reviewing Network Control Officer policies, procedures, manuals and instructions.
- Carry out as required such tasks and functions that are within the limits of the employee's skills, competence and training.

SELECTION CRITERIA

1. Core Competencies

- Considerable operational experience in an urban rail network or similar environment.
- Considerable working knowledge of the rules and procedures of an urban rail network or similar environment.

2. Management and Leadership

- Ability to monitor operational activities to ensure their safe and efficient operation.
- Highly developed ability to assume a leadership role in the event of incidents affecting the PTA's rail network.
- Ability to competently undertake appropriate action in the event of an emergency or incident.

3. Communication and Interpersonal

- Highly developed written, verbal and interpersonal skills.
- Ability to provide clear advice, direction and instruction to other team members, rail traffic crew, operational staff and maintenance personnel.

4. Conceptual, Analytical and Problem Solving

- Well-developed conceptual and analytical skills, including the ability to analyse and assimilate real time information and data from multiple sources, make sound decisions and provide clear advice in stressful situations.
- The ability to understand and remedy flow-on effects of incidents across the rail network.
- Ability to read and interpret operational diagrams and instructions to ensure scheduled operations are maintained.

5. Organisation

- Well-developed planning, time management and organisational skills including the ability to work under emergency and high-pressure conditions to make timely and accurate decisions and prioritise tasks to cope with competing demands and priorities.

6. Computer Literacy

- Ability to use Windows, Microsoft Office and specialised operational systems.
- Ability in learning new software systems.

7. Special Requirements

- Satisfactory completion of required medical examinations to verify physical fitness and psychometric suitability to perform the duties of the position.
- Provision of a current National Police Clearance certificate, dated 3 months or less from the date of application for the position.
- Possession of a current Western Australian 'C' or 'C-A' Class Driver's Licence or equivalent. This requirement continues for the duration of employment in this position and from time-to-time production of the licence on request by the PTA may be required.

-
- Applicants agree to comply with the PTA's Alcohol & Drugs Policy and Procedure, which includes random testing.
- Ability to work shift work and/or weekend work, as required, to a 24-hour day 7-day roster.
- Applicants must meet the special requirements shown below within an agreed period. Cancellation of the appointment, or cessation of employment may occur where the applicant does not meet the following requirements of the position within an agreed period of time:
 - TLI42215 Certificate IV in Rail Network Control
 - Supervised Worker (SW) Safeworking qualification
 - Relevant qualifications or skill sets required to induct, mentor and train new Network Control Officers
