The School Psychology Service provides specialist psychological assessment, diagnosis, intervention and consultation services:

- directly and indirectly.

Services are provided in the areas of:

- learning and motivation
- mental health and wellbeing
- emergency and critical incident management
- change management and organisational development, including professional learning for school staff, parents and caregivers.

The Department's School Psychology Service employs over 250 school psychologist FTE in a range of educational settings, providing proactive and responsive psychological services to school communities.

The Department's [Competency Framework for School Psychologists](#) addresses the complex work of the school psychologist by outlining four professional elements of school psychologists' work:

TITLE	CLASSIFICATION	POSITION NO.	EFFECTIVE DATE
School Psychologist	1.1 – SPS Y2	Generic	06 July 2018

- Key principles – the principles that guide all practice in school psychology
- Professional attributes – the underpinning values, beliefs and skills that form the base from which the school psychologist operates
- Professional knowledge – the psychological, educational, legislative and policy understandings required for day-to-day practice as a school psychologist
- Professional practice – the competency standards for effective practice for school psychologists, represented through five dimensions and across three phases along a continuum of school psychology practice.

While the phases of competency development described within the *Competency Framework for School Psychologists* are dynamic and not related to length of service, it is expected that school psychologists with provisional registration will be working to achieve the critical elements associated with the five dimensions of the school psychologists work at Phase 1.

School psychologists, including those employed by Independent Public Schools are professionally accountable to a Lead School Psychologist.
