

# Senior Project Manager - Roads

## Senior Project Manager - Roads

*Are you up for a challenge? Do you want to be part of a team, managing up to 2500 kilometres of road construction and maintenance work?*

This highly sought-after role in the picturesque Goldfields-Esperance region draws an attractive remuneration package. Dependent on relevant experience and allowances you can earn between \$158,243 and \$179,998 (AUD) (including superannuation).

### Where will the Senior Project Manager – Roads take you?

As Senior Project Manager – Roads, you will have the opportunity to immerse yourself in all facets of project management. From development to construction, you will have oversight of a \$120 to \$140 million annual program, including a \$40 million maintenance budget. Responsibilities also include managing the delivery of key regional projects:

- Goldfields Highway (Sealing the Wiluna to Meekatharra section) – \$20 million over the next four years;
- Great Eastern Highway (Upgrading Southern Cross to Coolgardie)- \$150 million over the next six years;
- Outback Way - Sealing the Great Central Roads between Laverton and the WA/NT border - \$142 million over the next six years.

Working in the Goldfields-Esperance region, you will gain invaluable experience managing projects in the vast and unique landscape. You will mentor and support staff to make best practice decisions for infrastructure projects in the Region. You will also collaborate with your team to improve future work delivery and play a key role in resourcing allocation for new projects.

### Why the Goldfields-Esperance region?

Representing a total land area of 771,276 square kilometres, the Goldfields-Esperance Region is three times the size of the state of Victoria and just under a third of Western Australia's total land mass.

The region spans from the breathtaking natural contrast of WA's Golden Outback and stunning national parks to white sandy beaches and crystal blue waters.

The landscape brings its own unique challenges for construction and maintenance, requiring solutions that are both compliant and fit for purpose. Some challenges the team tackle include:

- Delivering road construction and maintenance projects in isolated and remote locations;
- Identifying and sourcing materials and other supplies;
- Programming and undertaking work to suit both weather conditions and road user impacts;
- Understanding and working with local regional communities for win-win outcomes.

This position presents an invaluable opportunity to acquire the technical skills to resolve such challenges.

### The team...

Our regional team are enthusiastic and supportive of each other. Collectively, a team of 40 full time staff supported by key construction and maintenance contractors manage the delivery of an annual capital works and road maintenance program which has grown annually to beyond \$120 million annually. This trend is likely to continue as both the Commonwealth and State governments look to stimulate growth in the economy through funding and building infrastructure, including roads.

### We want to hear from you!

We are looking for people with:

- Experience in project and construction management, including road and/or bridge design or maintenance
- Exposure to managing resources and subcontractors
- Excellent stakeholder management skills and the ability to build relationships and communicate effectively
- Ability to influence, negotiate, persuade, and solve problems
- Enthusiasm, commitment, and a focus on achieving results

*Be seen as a leader on the work site, amongst your team and in the community. We don't just work here, we live here and this is your opportunity to be part of our Main Roads family.*
