

## Senior Project Manager - Roads

*Are you up for a challenge? Do you want to be part of a team managing 180km of road works and 4 major structures jobs?*

This is a highly sought-after role in the picturesque Pilbara region and draws an attractive remuneration package of between \$176,780 and \$199,896 AUD (including superannuation) dependent on relevant experience and applicable allowances.

### Where will the Senior Project Manager – Roads take you?

In the 2021/22 financial year alone, the Pilbara Region is managing a portfolio of approximately \$300 million of work, with this projected to increase again in the next financial year. As the Senior Project Manager – Roads, you will have the opportunity to immerse yourself in all facets of project development and construction, including the design and construction of the following key projects:

- [Marble Bar Road upgrade](#) – \$120 million
- [Port Hedland rail safety improvements](#) – \$85 million
- Roy Hill – Munjina Rd bridge – \$30 million
- Heavy Vehicle upgrades – \$15 million
- Burrup improvements – \$20 million
- [Karratha Tom Price \(KTP2\) Overlay](#) – \$30 million

You'll gain invaluable experience in managing the complexities associated with the Pilbara's dry and wet climates. You'll oversee construction progress, mentor and support staff in assessing best value engineering solutions, and collaborate and capture new ideas for improving future work delivery. The Senior Project Manager will play a key role in the resourcing allocation as new projects are finalised, advertised and awarded.

### Why the Pilbara Region?

The Pilbara is a vast area and is faced with a range of construction and design challenges. To address these challenges, our team embrace innovation and an 'out of the box' thought mentality to provide solutions that are compliant and appropriate for the region's unique requirements. Some challenges the team tackle include:

- substantial traffic loadings due to the excessively high numbers of 53.5m and 60m road trains working for the mining industry. Our teams work hard to design pavement and surfacing that can stand up to these constraints,
- selection of appropriate materials with the required geo-mechanical properties,
- development of financially viable designs that comply with the relevant standards, whilst being sufficiently robust to be able to withstand floods, cyclones, storm surges and even the occasional earthquake.

Working in the Pilbara region as the Senior Project Manager – Roads represents an invaluable opportunity to acquire the technical skills to resolve such challenges.

### The team...

Our Regional Project team are a tight knit and supportive group who manage approximately 20 significant projects of \$5million or more at the development, tendering or construction phase. The region is known informally as the development area for graduates and experienced engineers looking to further their career. Currently, there are approximately 13 Engineers working collaboratively to achieve the region's key deliverables.

### We want to hear from you!

We are looking for people with:

- Experience in project and construction management, including road and/or bridge design or maintenance
- Exposure to managing resources and subcontractors
- Excellent stakeholder management skills and the ability to build relationships and communicate effectively
- The ability to influence, negotiate, persuade and solve problems
- Enthusiasm, commitment and a focus on achieving results

*Be seen as a leader on the work site, amongst your team and in the community. We don't just work here, we live here and this is your opportunity to be part of our Main Roads family.*
