Role summary

Under limited direction and demonstrating considerable initiative and independent judgement, conducts extension and industry development. Contributes to the economic development of the agri-food industry with a focus on export led growth. The work generally impacts at the agri-food industry, industry sector level or equivalent. Delivers scientific research and investigational work as part of a team.

About us

The Department of Primary Industries and Regional Development's (DPIRD) role is to ensure that primary industries and regions are key contributors to the Government's agenda for economic growth and diversification, job creation, strong communities and better places. Our goals are to:

- **Protect:** to manage and provide for sustainable use of our natural resources and soils, and to protect Western Australia's brand and reputation as a reliable producer of premium, clean and safe food, products and services.
- **Grow:** to enable the primary industries sector and regions to increase international competitiveness, grow in value and social amenity and become a key pillar of the State's economy.
- **Innovate:** to support a culture of scientific enquiry, innovation and adaptation across primary industries and regions to boost industry transformation, economic growth and employment.

Our values

Our values are critical in creating a healthy and dynamic culture that helps each and all of us to make our best contribution, to develop a workplace where we feel excited about our work and results and where other people will increasingly want to join our team. Our values underpin how we operate:

- We value **relationships** - Our relationships with our clients, colleagues and stakeholders are at the heart of everything we do
- We are **resilient** - We recover from setbacks, embracing and adapting to change because we have a clear focus on the big picture and long term impact
- We are **responsive** - We understand the needs of our clients, colleagues and stakeholders and add value by tailoring our solutions accordingly
- We focus on **results** - We strive to develop and provide excellent services that delivers meaningful results to the community we serve.

Key responsibilities

The key responsibilities of the role include, but are not limited to, the following:

Advisory and Communication

- Promotes effective working relationships with stakeholders, agri industry groups, farmers, other agricultural research and development organisations and agribusinesses.
- Enhances the international competitiveness of agricultural industries by working across the supply chain to meet the standards for safety and quality of food and fibre products.
- Provides scientific expertise in land use planning, integrated farming system analysis and industry development as required.
- Actively promotes technology and systems, and prepares and disseminates the results of research by mass media including reports, articles, broadcasts and field days so that findings may assist farmers, agribusiness, department officers and the wider scientific community.
- Coordinates monitoring and reporting of policy, market, technological and organisational changes affecting the profitability and sustainability of agricultural industries.
- Coordinates the development and application of economic and farm business management methodologies to assist senior officers in project planning.

- Coordinates the promotion of industry development and market intelligence through close contact with farmer groups, extension specialists, private consultants, marketers and end users.
- Develops new initiatives and prepares project proposals to relevant funding bodies, as appropriate.
- Develops and utilises decision support systems and models to assist in conducting analysis and evaluation of systems and processes.

Research

- Initiates and carries out research to improve sustainable agricultural production.
- Initiates, designs and conducts laboratory and/or field experiments.
- Collects, tabulates, analyses and interprets experimental data.
- Coordinates and conducts economic analyses to improve policies, technologies and market opportunities to identify profitable opportunities for technical change, policy and industry structural change.
- Develops and maintains an up to date knowledge and awareness of research, findings, issues and trends relevant to area of expertise.
- Completes progress reports to meet project specifications.
- Reviews and publishes relevant technical publications, prepares press releases and, writes reports of industry significance.
- Publishes work in relevant scientific journals attracting state-wide, departmental or industry sector acclaim.

General

- Provides project reports.
- Prepares and maintains budgets and manages expenditure.
- Supervises technical and support staff as required.
- Cooperates and collaborates with staff from other organisations.
- Major contributor to section/project planning processes.
- Carries out duties under relevant State and Commonwealth Acts.
- Applies risk management to all business processes.
- Undertakes emergency response duties as required.
- Other duties as required.
