Role summary

Under the immediate guidance of senior staff, carries out assigned extension and industry development. Contributes to the economic development of the agri-food industry with a focus on export led growth. The work generally impacts at the enterprise level or equivalent. May participate in scientific research and investigational work.

About us

Our department (DPIRD) leads sustainable development of WA's regions and agriculture, aquaculture, food and fisheries sectors. Our Ministerial portfolios are Agriculture and Food, Fisheries and Regional Development.

We **unlock and guide economic opportunities** for these sectors and regions, balanced with the **stewardship of our land and aquatic resources**.

In everything we do we take the approach of:

- **Protect** through stewardship of our people, land and aquatic resources.
- **Grow** our primary industries and regions through balancing social, economic and environmental drivers.
- **Innovate** through a culture of inquiry and adaptation.

We draw on our grow, protect, and innovative approach to deliver priorities under three outcome areas:

1. Management and stewardship of WA's land and aquatic resources.
2. Capable and empowered communities.
3. Dynamic regions and primary industries

Our values

Our values are critical in creating a healthy and dynamic culture that helps each and all of us to make our best contribution, to develop a workplace where we feel excited about our work and results and where other people will increasingly want to join our team. Our values underpin how we operate:

- **Working together** – We achieve better outcomes with our colleagues, stakeholders and the community by engaging with their ideas, knowledge and expertise.
- **Acting with integrity** – We foster a culture where individuals are accountable for their actions, behaviours and contributions.
- **Responding with purpose** – Our actions and reactions are intentional, well thought out and align with a specific objective or goal.
- **Embracing curiosity and creativity** – There is always space to be innovative, through curious and creative thinking.
- **Aspiring for a better future** – Our combined efforts deliver sustainable results – environmentally, socially and economically.

Key responsibilities

The key responsibilities of the role include, but are not limited to, the following:

Advisory and Communication

- Maintains effective working relationships with stakeholders, agri industry groups, farmers, other agricultural research and development organisations and agribusinesses.
- Assists in enhancing the international competitiveness of agricultural industries by impacting individual enterprises to meet the standards for safety and quality of food and fibre products.
- Applies scientific knowledge in land use planning and integrated farming system analysis as required.
- Under guidance, promotes technology and systems, and prepares and disseminates the results of research by mass media including reports, articles, broadcasts and field days so that findings may assist farmers, department officers and the wider scientific community.

- Assists with the monitoring and reporting of policy, market, technological and organisational changes affecting the profitability and sustainability of agricultural industries.
- Assists in the development and application of economic and farm business management methodologies to assist senior officers in project planning.
- Supports industry development and market intelligence through close contact with farmer groups, extension specialists, private consultants, marketers and end users.
- Assists in developing new initiatives and prepares project proposals to relevant funding bodies, as appropriate.
- Applies decision support systems and models to assist in conducting analysis and evaluation of systems and processes.

Research

- Assists with research to improve sustainable agricultural production.
- Assists with designing and conducting laboratory and/or field experiments.
- Under supervision, collects, tabulates, analyses and interprets experimental data.
- Assists with economic analyses to improve policies, technologies and market opportunities to identify profitable opportunities for technical change, policy and industry structural change.
- Maintains an up-to-date knowledge and awareness of research, findings, issues and trends relevant to area of expertise.
- Under guidance, completes progress reports to meet project specifications.
- Under guidance, reviews and publishes relevant technical publications.

General

- Contributes to the preparation of project reports.
- Reports on own activities as required and general correspondence.
- Maintains budgeting processes as directed and assists with managing expenditure.
- Supervises technical and support staff as required.
- Cooperates and collaborates with staff from other organisations.
- Participates in section/project planning processes.
- Carries out duties under relevant State and Commonwealth Acts.
- Applies risk management to all business processes.
- Undertakes emergency response duties as required.
- Other duties as required.
